

PHOTO BOOTHS

The New Event Sensation

www.photo-crazy.com

What is a photo booth?

Remember the old fashioned booths you would visit for a passport photo in the pre digital age? Well a photo booth is a modern take on that.

Instead of your guests having to find sufficient change to feed the machine, you pay a single set fee which entitles you to unlimited prints at your event.

Instead of the interminably long wait for your prints to be developed, our state of the art Sony dye sublimation printers deliver a laboratory quality print in less than 20 seconds.

Where can they be used?

They are perfect for any event, weddings, parties, corporate events, exhibitions, the list is endless.

Custom Designed Print Layouts

We offer a range of different print options, from a straightforward strip with your 4 photos, to a sophisticated multi layer print with a background of your choice and additional foreground elements such as company logos, or details of your party or wedding. We can also set the system to produce double prints, this allows your guests to keep one print for themselves and another can be placed inside a guest book, with the metallic effect pens we provide the guests can leave comments, best wishes etc.

We Offer A Free Design Service Providing You With Custom Prints

We Offer Fancy Options Such As Photo Cube Prints

Double Print Allowing One to Be Placed In A Guest Book

FREE Custom Printed Information Panel

All of our booths have an A3 sized information holder on the front. This can be used to display promotional material, invite people to use the booth, thank people for coming to an event, the list is endless. Our designers will work with you to create your own custom panel at no additional cost.

Photo Booth Extras

External Display

We provide the facility to link your external screen or projector to our booth allowing guests on the outside of the booth to watch the fun as it happens. We can also provide this facility via a wifi link.

The software automatically runs through a slide show, as more guests use the booth the slideshow automatically adds their images.

Facebook Upload Facility

Our system has the capability to be linked to an existing wifi or ethernet network and upload the images taken either to Facebook or to a specially created webpage. We can also supply the system with its own 3g internet link (subject to coverage) allowing image upload from more remote locations.

Downloadable Hi Resolution Images

As standard all of the images taken by the photobooth are uploaded to the Photo Crazy website, each guest is supplied with an access code allowing them to download the images in high resolution 10MP format to print at will or use in any way they desire. The website also allows photographic prints to be ordered in various sizes, we print them using our in house photo print systems, mount them in a display mount and then send them to you.

VideoBooth

Booth can also be supplied with videobooth functionality, this allow you to select between printing a set of images, or recording a short video message, the messages are supplied after the event on DVD, and if required we have in house editing capabilities to provide a professionally produced disc of video and photographs.

The videobooth can also be combined with the upload facility allowing the video clips to be emailed to your friends.

Green Screen System

Any of our booths can be supplied with a green screen system, this is the same software as used by Hollywood special effects teams. Basically the coloured drape behind you is replaced with a green screen. The photo booth takes your picture as normal, but instead of a green screen on the print, you discover that a completely different background has appeared, this can be something with a theme such as wild west, or world war 2, or can be a custom produced backdrop with your corporate logo.

Extended Booth

We have the capability to set up an extra large studio booth with additional lighting and designed to take groups of upto 12 people (more if they are pictured kneeling and standing), this is ideal for teambuilding events and college functions.

Photo Booth Extras

Props Box

We can supply props with our photo booth, so for instance a wild west themed event would see a selection of cowboy hats, six shooters etc. Supplied with the booth.

Bluetooth Advertising System

Our booths can be fitted with bluetooth proximity marketing systems. These can be programmed to connect to and send files of any type to mobile phones and PDA's within a 100m radius. The system automatically scans for devices and then contacts them asking for permission to connect. Once connected the system can send video's images, sound files even downloadable brochures.

Print Station

A perfect complement to one of our photo booths is our new SnapLab photographic system.

This unique system allows your guests to connect their mobile phones using bluetooth and print their own images within seconds.

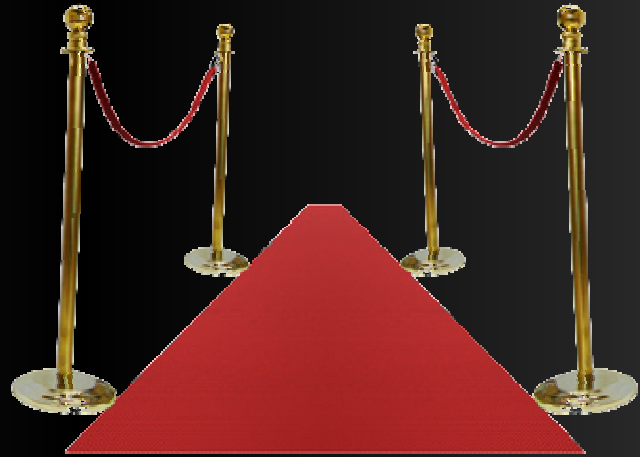

The system can be set to automatically add borders and logos to promote your event or party, and is supplied on either a full sized floor standing pedestal, or a compact table mounted display stand..

Paparazzi Photographers

For the ultimate impact why not add one of our Paparazzi photographers to greet your guests as they enter the event. Dressed in a retro paparazzi style of a long trench coat and fedora hat, our photographers capture stunning shots of your guests as they enter on the red carpet., which we can supply if required.

After the entrance they continue to work the room taking images of your guests having fun, the images are all uploaded to our web site and can be downloaded free of charge in digital format, or stunning quality prints can be ordered online.

Frequently Asked Questions

How are the images printed?

We use state of the art dye sublimation printers from Sony which provide a dry waterproof top quality laminated print within seconds.

How big are the booths?

Our standard booth is 72 inches wide, 40 inches deep and 78 inches high, our extendable booths can be assembled in various sizes to suit the requirements of your event and the available space.

Can they be used outdoors?

Sadly rain and electricity do not mix, although we can supply a gazebo system for a small additional cost.

Can they be taken upstairs?

Our booths can be dismantled and carried up stairs or fit into a standard sized lift.

What sort of quality are the images.

Our booths use quality Digital SLR cameras, just like professional photographers use, this means that the images are top quality high resolution photos, none of our booths use webcams to take the pictures as we feel the quality of webcam booths are not suitable.

How Much Do They Cost To Hire?

That's a tough one to answer as it depends on where your event is to be held and when, some dates are more expensive than others due to additional staffing costs. If you are hiring a combination of items such as paparazzi photographer, print stations with your booth, then we can offer you a special package deal at reduced prices.
